

Creating a Selenium WebDriver Test Project in C#

Jason Roberts

.NET DEVELOPER

@robertsjason www.dontcodetired.com

Overview

Introduce the web app to be tested

Create a test project

Install Selenium WebDriver into the test project

Create an initial test

Navigate to a URL with WebDriver

Summary

Introduced the web app to be tested

Created an xUnit.net test project

Installed Selenium NuGet packages

- Selenium.WebDriver
- Selenium.WebDriver.ChromeDriver

`IWebDriver driver = new ChromeDriver()`

`driver.Navigate().GoToUrl(...);`
